

Project In Action Workshops

During a project there are many standard activities that must be accomplished, but if you don't have the necessary training and experience these can appear daunting. Harrison International Ltd bridges the skill gap by offering **facilitated project workshops to plan and execute your projects** under the guidance of a skilled project manager and trainer.

Examples of workshop options include:

- Scoping/Defining the project
- Developing requirements
- Preparing project estimates
- Developing a schedule
- Defining a risk management strategy
- Communications planning
- Stakeholder management
- Task management
- Lessons learned

What You Receive

- Workshop outcomes agreed up front
- Facilitation through the specified project process (see above)
- Delivery against agreed outcomes

What You Can Be Assured Of

Harrison International Ltd workshop consultants:

- Are experienced project managers, certified through the Project Management Institute, and are skilled in facilitating workshops
- Will act in a professional manner
- Follow a process and deliver results in accordance with recognised project management practices

Benefits To You

- Quick start to project planning and execution activities
- You maintain control of your own project
- Targeted assistance — as, when and what you require
- Frees the project manager to focus on quality of content
- Learning opportunity for your team — best practices applied to your project
- Enhanced success through key tasks being performed the right way
- Morale soars as team feels shielded from failure

Harrison International Ltd can help your organisation deliver projects with greater success by shielding your teams from any knowledge, skill or experience gaps they have. **Contact us now to initiate your *Project In Action Workshop*.**
